

Dan Roman

President of the Management Board of S&T Romania
Senior Advisor of the S&T Group Board

Professional Experience

Dan Roman is an entrepreneur, investor and IT professional with focus on Emerging Markets. In 1989, after the termination of the communist era in Romania, he was a pioneer in establishing one of the first private companies in the country - RBS Ltd. (Romanian Business Systems), that became the local market leader. Roman managed RBS as CEO and owner until 1995, when he sold the company to IBM.

In 1996 he was appointed Director of IBM CER in Vienna, being responsible for countries in the Balkan and CIS area. In this capacity he created for IBM the partner network and the frame for establishing local subsidiaries.

In 2000 Roman set up his own company, eNet Data G.m.b.H., based in Austria, dealing with IT services and solutions and with branches in a couple of countries from EE. eNet Data was acquired in 2002 by S&T A.G., an Austrian IT public company.

After being Senior VP of S&T and Region South/East General Manager until end of 2008, Roman is working today with S&T Romania as President of the Management Board and also function as Senior Advisor of the S&T Group Board.

Prior to founding RBS, Roman worked as Technical Director of ITC, the Research Institute for Computers in Romania, being responsible for SW development. He was one of the first IT professional who introduced in Romania the Computer Aided Design/ Computer Graphics as field of research and development.

Dan Roman is author, co-author or collaborator of a significant number of papers, books, articles, regarding IT and related topics.

Education

Dan Roman holds a PhD degree in Computer Science and graduated from the Romanian Polytechnic University in Bucharest.
